1. PURPOSE

1.1 The purpose of this Request for Bids is to invite competent service providers to submit proposals for the provision of maintenance and support service which includes system enhancements of the ERP System to ensure an optimal performance of the targeted services.

2. INTRODUCTION

2.1 The Office of the Valuer-General is a state entity of the Department of Agriculture, Land Reform and Rural Development established in terms of the Property Valuation Act No.17 of 2014 (PVA) and its subsequent listing as a National Public Entity listed in terms of Schedule 3A of the Public Finance Management Act.

2.2 The OVG has the mandate of supporting the programme of Land Reform through providing independent and credible property valuation services. It is envisaged that, through the mandate specifically designed for this entity, land claim values will be settled with greater efficiency and decisiveness, thereby speeding up the process of Land Reform.

2.3 The OVG currently has 68 employees and is expecting the number to grow to 150 employees in the 3-5 years.

2.4 The OVG has successfully implemented the Sage Enterprise Resource Planning, (ERP) system since October 2021 and the contract with the current business partner will be expiring in due course. The Sage ERP supports the Financial Management, Asset Management, Human Resources Management, Supply Chain Management and Valuation Management Business processes.

2.5 It is against this background that the OVG would like to invite suitably qualified service providers to submit quotations for the maintenance and support of the ERP System.

3. BACKGROUND

The below section outlines the current environment and services related to the ERP service.

3.1 SERVER INFRASTRUCTURE

3.1.1 The ICT environment of the OVG operates on an on-premises Microsoft Server 2019 environment and Aruba Network Environment which is predominantly supported and maintained by the internal resources with support from the various service providers.

3.1.2 The current ERP Server environment includes five applications servers housing the ERP modules, a QAS (Test) Server and a shared database Server. The ERP modules operate on a three-tier architecture as depicted below, the Applications Sever and Database Server, and client desktop and web-based applications.
